What do our Clients say?

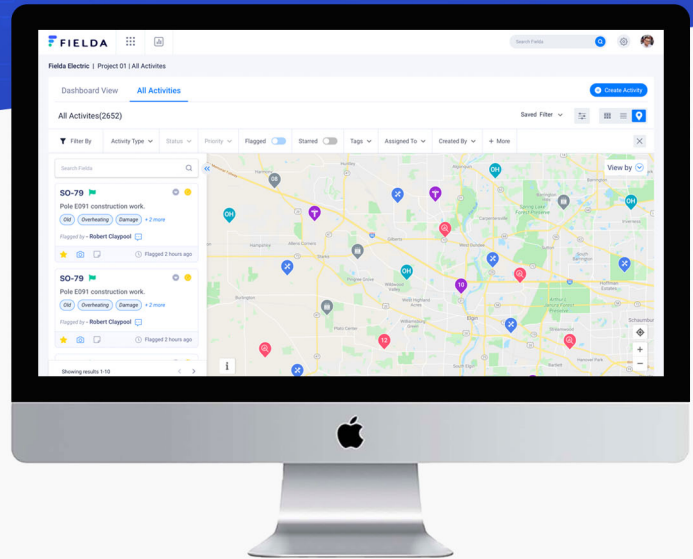

"Fielda saves us a lot of time and money that was wasted trying to find things based on pole number and paper records."

-Dennis Mabe, VP of Engineering & Operations,
Randolph EMC, North Carolina

USE CASES

- ✓ Pole inspections
- ✓ Transformer inspections
- ✓ Monthly/Yearly substation inspections
- ✓ OH inspections
- ✓ UG inspections
- ✓ Traffic control stations inspections
- ✓ Three phase regulator inspections
- ✓ Pole attachments surveys
- ✓ Meter changes
- ✓ Maintenance audits
- ✓ Generic service orders
- ✓ Deficiency work orders
- ✓ Location of field workers (replacement of AVL)
- ✓ Web services based third party integration
- ✓ Fault locators
- ✓ Breadcrumbs for documentation of line inspections
- ✓ Arial inspections module for rapid assessments
- ✓ NiSC integration for service orders
- ✓ AMI integration for blinks, meter readings, high voltage, low voltage, connect/disconnect, etc

FEATURES

- ✓ Document and manage activities
- ✓ Add notes, photos, and location
- ✓ Search by keywords or location
- ✓ Export your data
- ✓ Collaborate with others
- ✓ Build custom forms
- ✓ Work offline
- ✓ Dispatch and assign work
- ✓ Schedule and plan activities
- ✓ Track due dates
- ✓ Manage multiple projects
- ✓ Customize projects
- ✓ Review edit histories
- ✓ Select from detailed observations
- ✓ Customize priorities
- ✓ Build custom workflows
- ✓ Configure maps
- ✓ Receive email and push notifications
- ✓ Download detailed reports
- ✓ Use the advanced admin dashboard
- ✓ Additional User.
- ✓ Additional GIS Data Update.
- ✓ Custom Reports.
- ✓ Additional specific field Activities.
- ✓ Additional Storage Space.
- ✓ IoT Integration with Assets to monitor.
- ✓ Additional services such as advanced map configurations, Integrations, Customisations, ad-hoc work, consulting, training etc.
- ✓ Custom reports
- ✓ 3rd party integrations
- ✓ Billing systems
 - Engineering systems
 - Drones
 - IOT
 - AVL
 - Others
- ✓ Training
- ✓ Consulting
- ✓ Data Analytics
