

Software to manage your
field operations

BORDER STATES
Supply Chain Solutions™

What is Fielda?

Field Operations Management Software that helps with the following

ASSET INFORMATION

- Get asset information when you are in the field.

DOCUMENT OBSERVATIONS

- Helps you **document observations**:
- Simple inspections (e.g. visual line inspections)
 - Detailed inspections (e.g. pole inspections)
 - Breadcrumbs: documentation of drive-by or fly-by visual inspections
 - Rapid assessments
 - Ground patrol
 - Aerial patrol

MANAGE ACTIVITIES

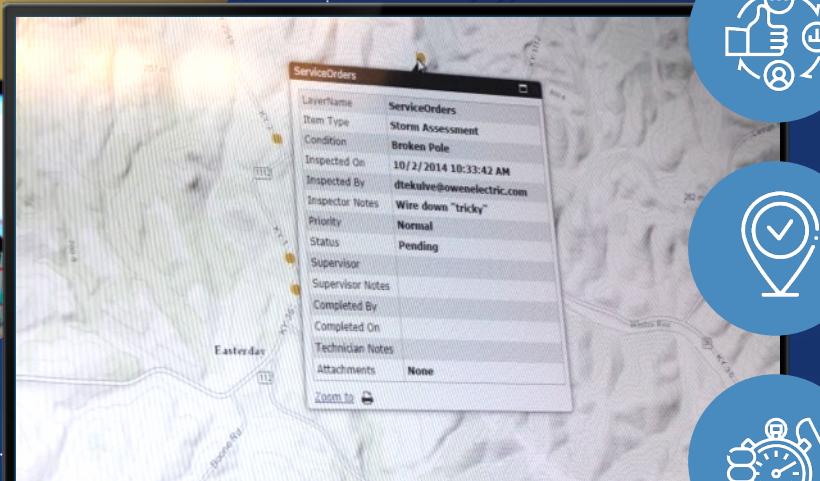

- Helps you **manage activities** in your field (data with **workflows**)
- Plan/assign/complete service orders, work orders , maintenance work, construction work, vegetation management, and any other field activity.

Fielda On The Ground And In The Air

- Faster Ground inspections
- Inspections with helicopter 3 circuits in 3 hours
- Tested at speeds of 60mph and altitudes of over 200ft
- Identified areas for vegetation maintenance, cracked cutouts, etc.
- Sent inspection and service order reports from the air to the office in real time.
- Huge implications for doing storm damage assessment.

Realtime Updates To The Office

Updates are **synced** from the field with dashboard

Track location and status of issues

Track how much work has been done in the field

Use Cases Implemented by Our Clients

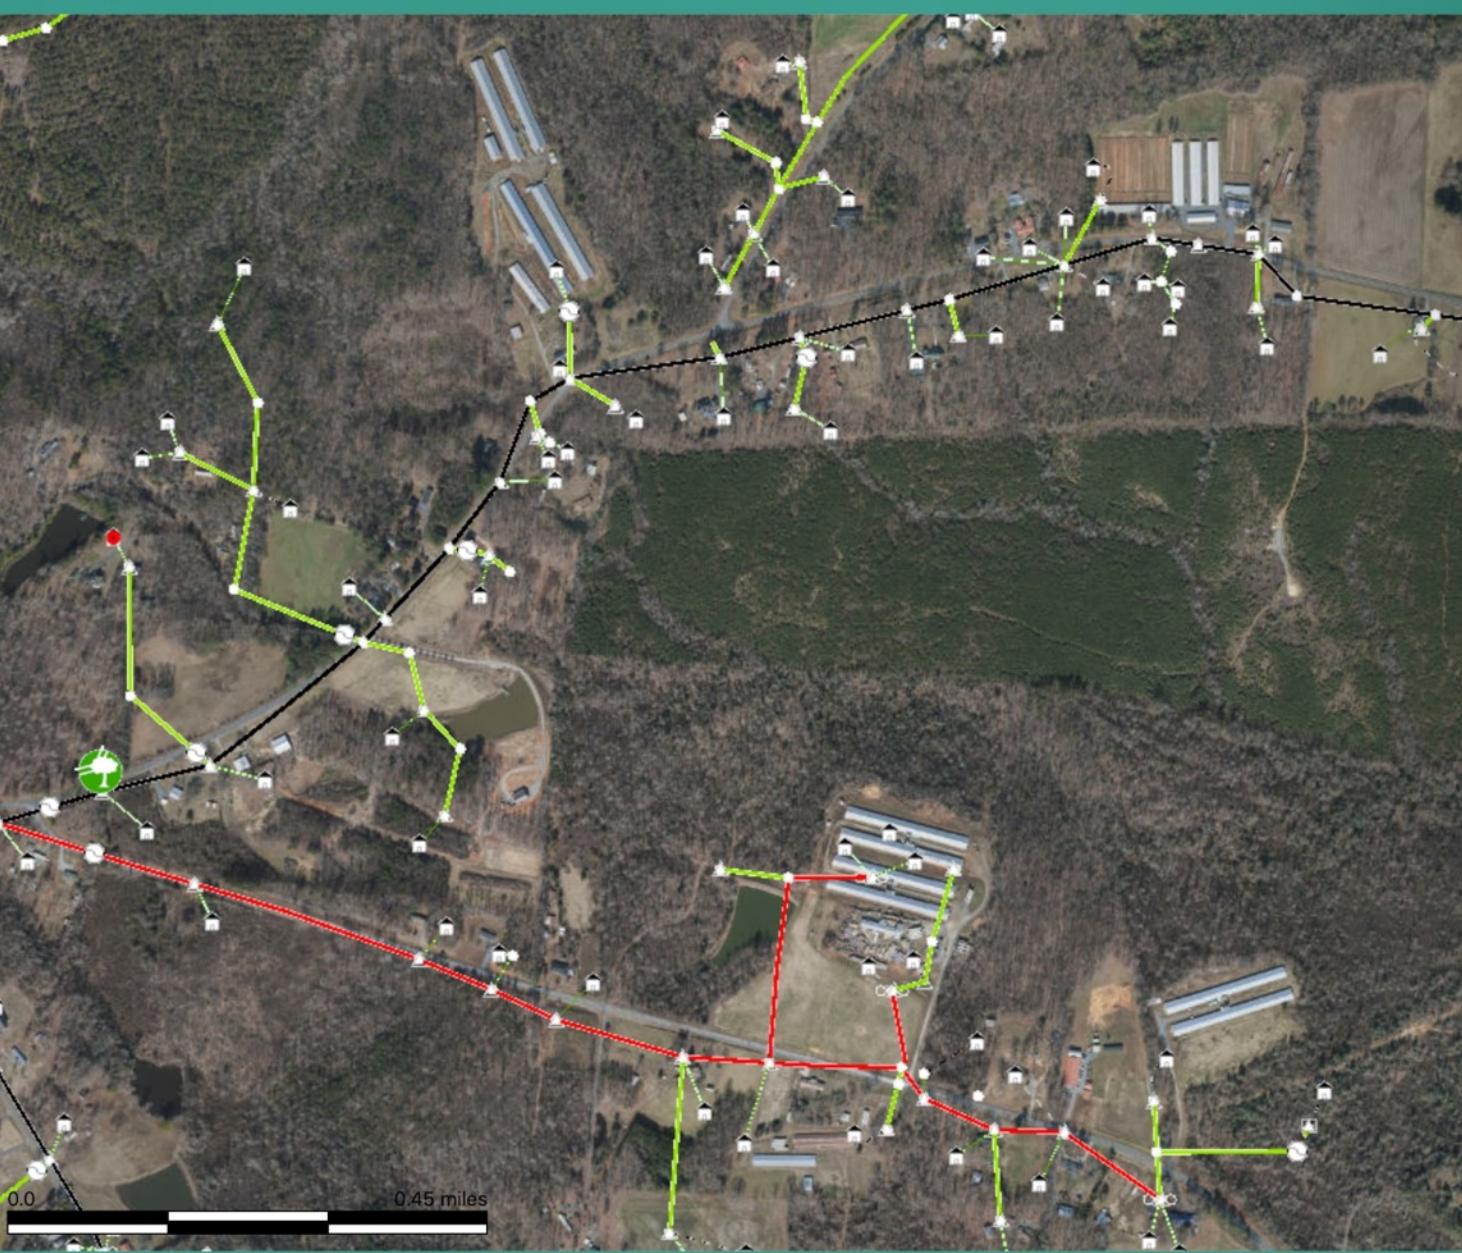

- Pole inspections
- Transformer inspections
- Monthly substation inspections
- Yearly substation inspections
- OH inspections
- UG inspections
- Traffic control stations inspections
- Three phase regulator inspections
- Pole attachments surveys
- Meter changes
- Maintenance audits
- Generic service orders
- Deficiency work orders
- Location of field workers (replacement of AVL)
- Web services based third party integration
- Fault locators
- Breadcrumbs for documentation of line inspections
- Aerial inspections module for rapid assessments
- NiSC integration for service orders
- AMI integration for blinks, meter readings, high voltage, low voltage, connect/disconnect, etc.
